Hands-On

The course uses an extensive Case Study of a major telecomms service provider as a continuous theme to re-enforce the learning environment and build upon both skills and knowledge.

Yours Free To Take Away

- The OGC "Management of Risk" Manual
- M_o_R pre-courses preparation materials
- Copies of slides, handouts and exercises.

Objective

This course is designed to provide the skills and experience required to implement the APM group accredited methodology for the Management of Risk, developed in coordination with public and private sector organisations. **Plus the APMG accredited M_o_R Practitioner qualification.**

M_o_R provides organisations with a method for putting in place a framework for managing risk. It outlines a route map for effective risk management, which incorporates principles, a process, approaches and techniques, as well as substantial supporting material for day-to-day implementation.

M_o_R provides a disciplined environment for proactive decision-making and assists in the development of Business Cases. Furthermore, the approach complements the MSP and PRINCE2 methodologies.

Who Should Attend

This course is invaluable for business managers, process owners, strategic planners, corporate governors, project and procurement teams, business continuity planners, security teams, and **all staff who require the APMG accredited M_o_R Practitioner qualification.**

M_o_R[®] is a Registered Trade Mark of the Office of Government Commerce in the United Kingdom and other countries.
